Viewing the Dashboard from Your Mobile Device

The SAS Visual Analytics app is available on iTunes:

<https://itunes.apple.com/us/app/sas-mobile-bi/id511030524?mt=8>

and on Google play:

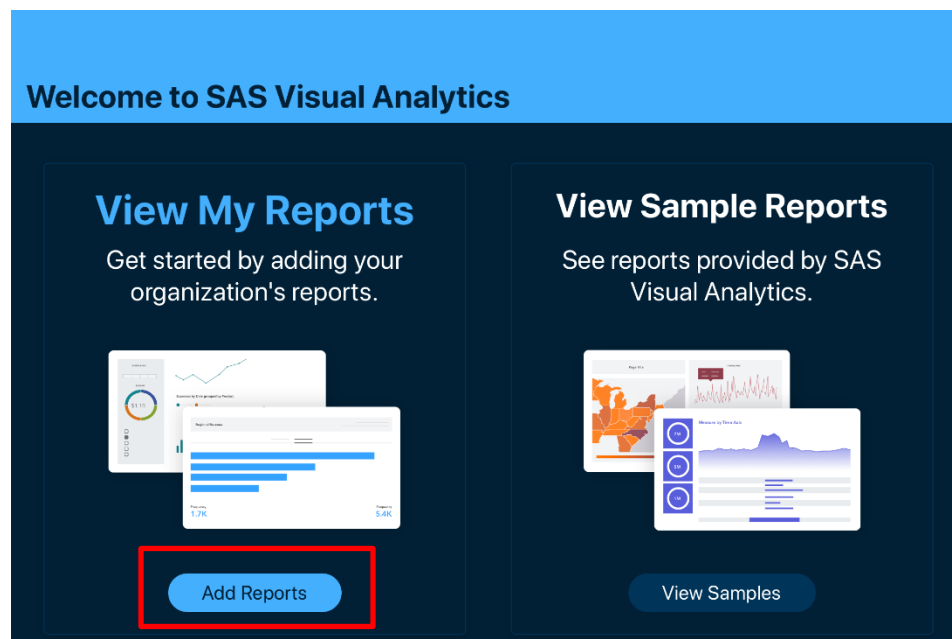

<https://play.google.com/store/apps/details?id=com.sas.android.bimobile&hl=en>

SAS® Visual Analytics empowers decision makers with business reports and dashboards anywhere, anytime! The SAS Visual Analytics App, part of the SAS® Visual Analytics product family, enables you to view and interact with reports that can contain a variety of charts, graphs, gauges, tables, and other report objects.

To use the SAS VA app, you must be connected to UCF WiFi (UCF_WPA2) if you are on campus. If you are off campus, you must connect to the Cisco AnyConnect VPN app first.

Setup Instructions

After the app has been installed on your device, click **Add Reports** at the bottom of the screen to begin setup.

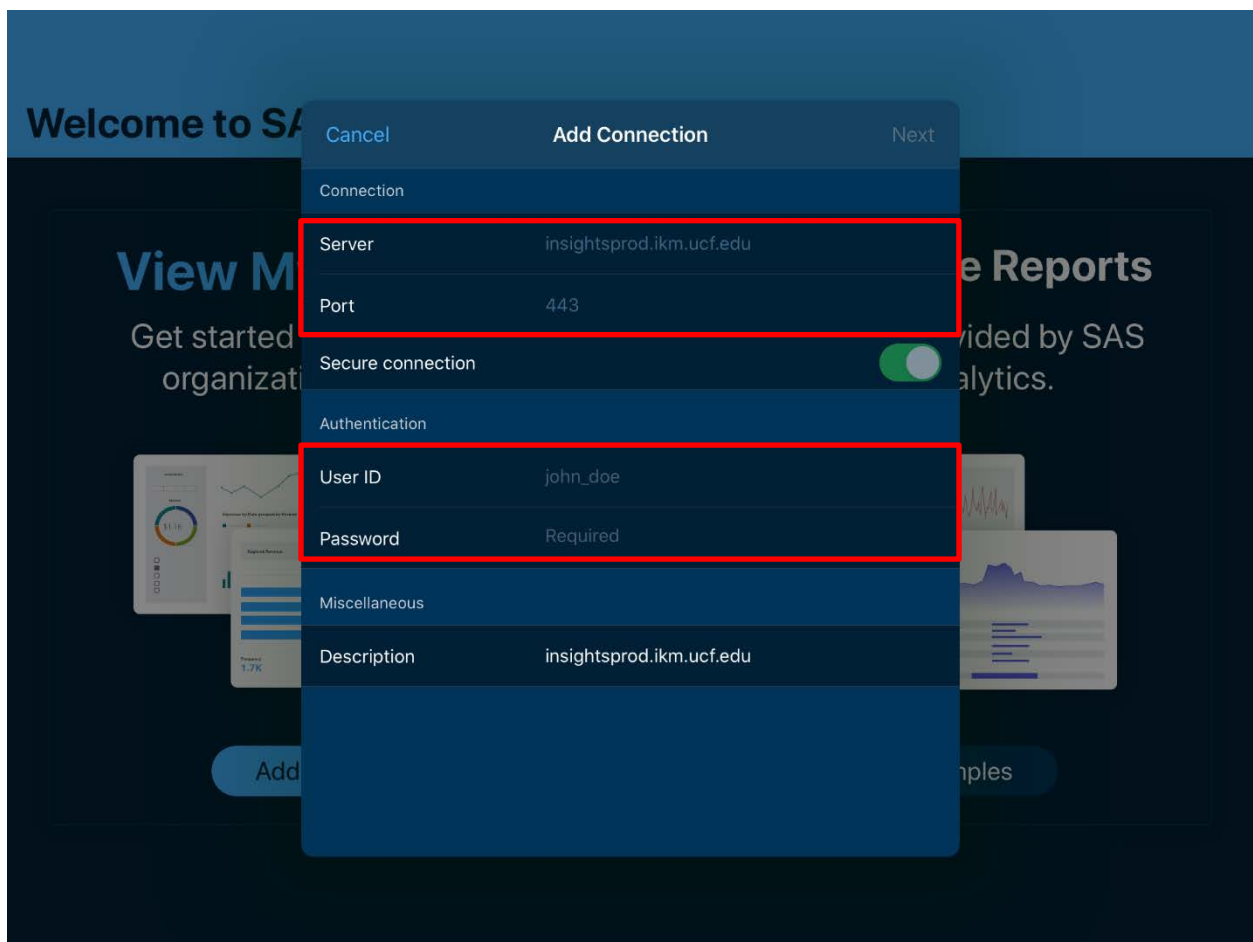

Add a Connection

When prompted, enter the following:

- **Server:** insightsprod.ikm.ucf.edu
- **Port:** 443

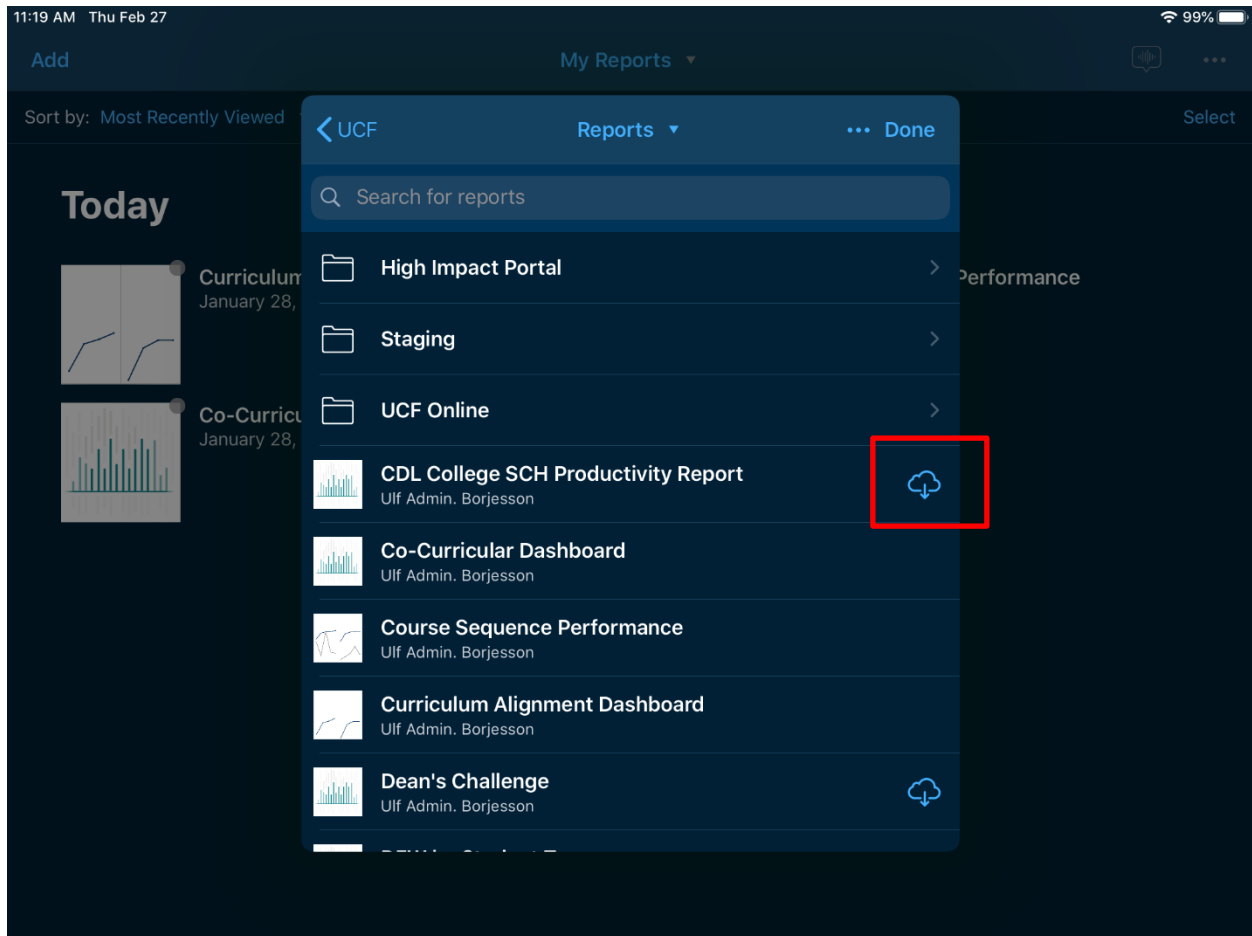

After you are connected, you will be prompted to enter your UCF credentials (NID & password).

Find a Dashboard

To find a dashboard click **VAPTree > UCFPublic > UCF > Reports**

To subscribe to the dashboard, click the **cloud icon** to the right of the dashboard name. The dashboard will then be added to your home page.

The dashboard tabs are treated as pages in the SAS Mobile BI app. To navigate to a different tab, click the tab name on the top of the screen and a drop-down with all report tabs will appear.
